5. **Workforce and Organizational Effectiveness....**Investing in people through appropriate training, salary and benefits improves workforce and organizational effectiveness.
6. **Empowerment....**Communities recognize and respect the ability of people (1) to make informed choices about their personal goals, about the activities that will make their lives meaningful, and about the amounts and types of services to be received; and (2) to understand the consequences and accept responsibility for those choices.
7. **Active Participation....**Individuals and families actively participate in service planning; in evaluating effectiveness of providers, supports and services; and in policy development.
8. **Accountability and results for providers....**Innovative thinking, progressive strategies and ongoing measurement of outcomes lead to better results for people.
9. **Responsibility and accountability for government....**Adequate funding and effective management of supports and services promotes positive outcomes for Iowans.

**Definitions**

**Goals** are the broad long term results towards which efforts and resources are to be directed in order to transform Iowa's mental health and disability service system. The five goals of this plan are over arching themes emerging from years of public dialogue with stakeholders. **Objectives** are more specific, shorter term end results that help us refine our thinking about what it takes to achieve our goals. Many objectives listed serve more than one goal. **Action steps** are initiatives to achieve specific measurable outcomes that help us progress towards the objectives under which they are listed. They too can serve more than one. Action steps will be refined to include measures of success, milestones and timetables. **Strategic priorities** are the sets of initiatives that will be the primary focus of the Department's energy and resources (budget) over the next one to two years, because of the importance of the need addressed, the opportunities currently available to make significant progress in addressing that need, or other factors such as new statutory mandates. Resources will not be focused solely on strategic priorities, since there are on-going responsibilities and important work to be done on a wide range of initiatives. Strategic priorities do provide focus and clarity in transformation efforts.
